

Configure iOS (iPhone, iPad or iPod Touch) for Eduroam WiFi

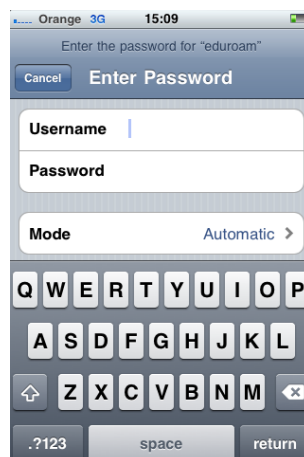

Turn on the wireless on your device by touching "Settings" then "Wi-Fi". You should see a list of the available wireless networks.

Select "eduroam"

Enter your username as your UUN plus "@ed.ac.uk", e.g. "myuun@ed.ac.uk".

Enter the password which you specified when you registered for the Wireless service.

You will be asked to trust a UTN-USERFirst-Hardware certificate for either "archer.ucsf.edu.ac.uk" or "ispy-at.ucsf.edu.ac.uk". The UTN-USERFirst-Hardware certificate is signed by AddTrust External CA Root.

Touch "Accept" to trust this certificate.

You will be returned to your device's "Wi-Fi Networks" screen.

A tick beside "eduroam" should show that you are now connected to the secure wireless network.
